

Answer key

Problem 1.

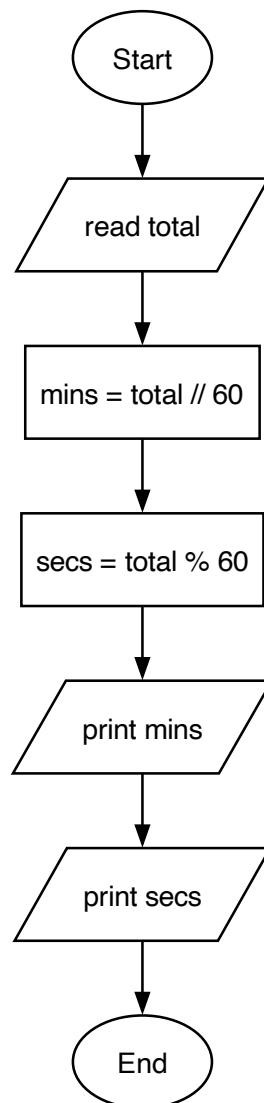

Problem 2.

(i) Expected output for each input:

input <i>total</i>	output
200	3, 20
95	1, 35
60	1, 0

(ii) Flowchart:

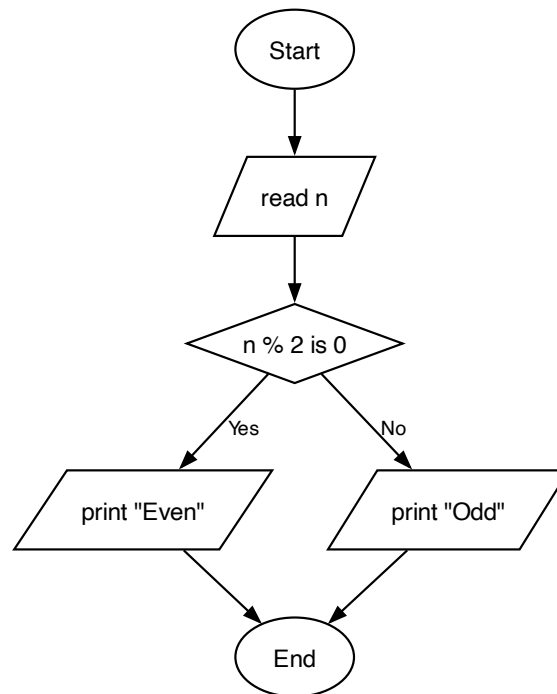

Problem 3.

(i) Expected output for each input:

input n	output
7	Odd
10	Even
0	Even

(ii) Flowchart:

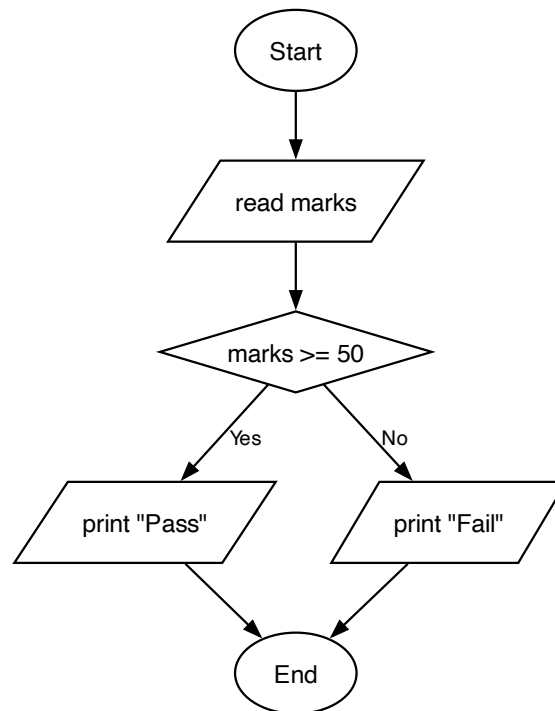

Problem 4.

(i) Expected output for each input:

input <i>marks</i>	output
72	Pass
50	Pass
38	Fail

(ii) Flowchart:

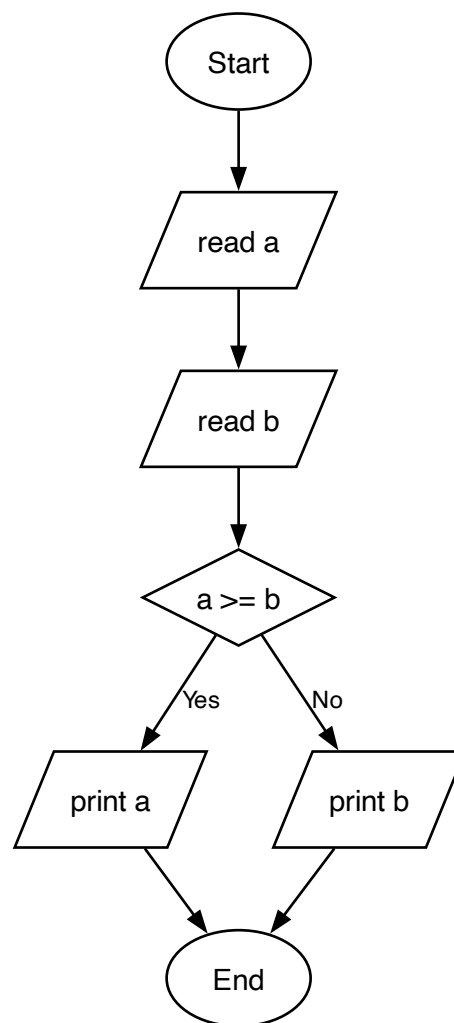

Problem 5.

(i) Expected output for each input:

input a	input b	output
8	3	8
4	9	9
6	6	6

(ii) Flowchart:

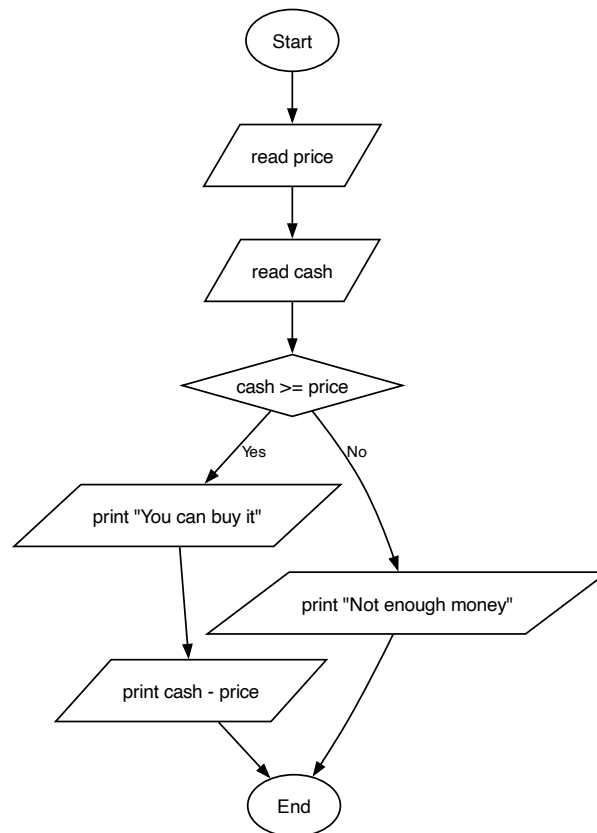

Problem 6.

(i) Expected output for each input:

input <i>price</i>	input <i>cash</i>	output
50	80	You can buy it, 30
50	50	You can buy it, 0
50	20	Not enough money

(ii) Flowchart:

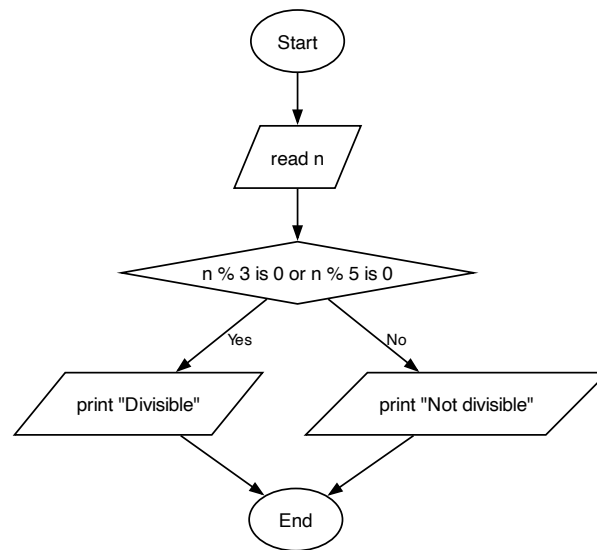

Problem 7.

(i) Expected output for each input:

input n	output
9	Divisible
20	Divisible
7	Not divisible

(ii) Flowchart:

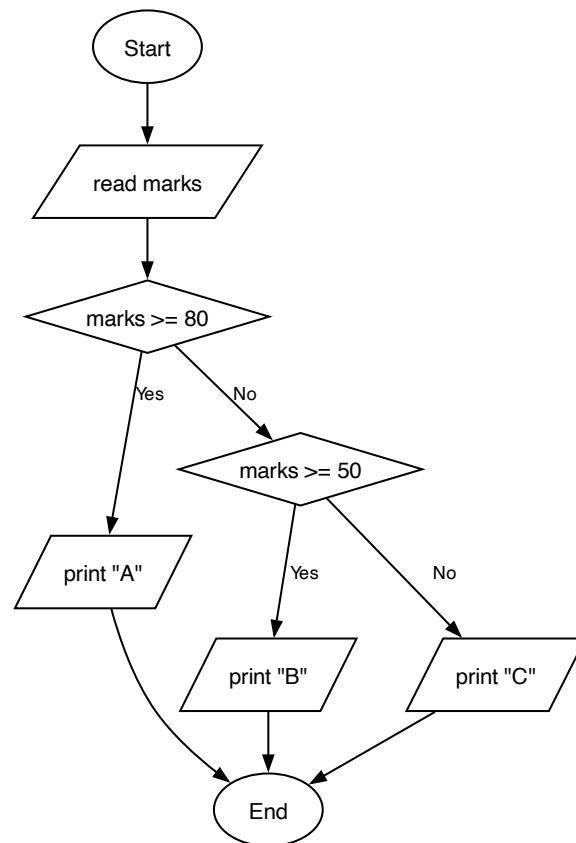

Problem 8.

(i) Expected output for each input:

input <i>marks</i>	output
91	A
64	B
42	C

(ii) Flowchart:

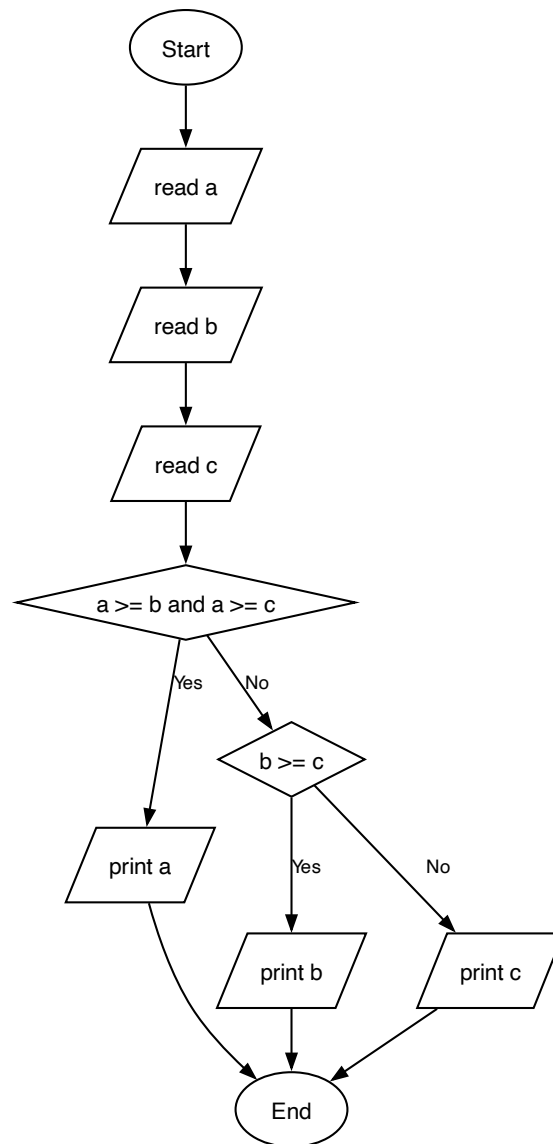

Problem 9.

(i) Expected output for each input:

input a	input b	input c	output
4	9	2	9
7	1	5	7
3	3	8	8

(ii) Flowchart:

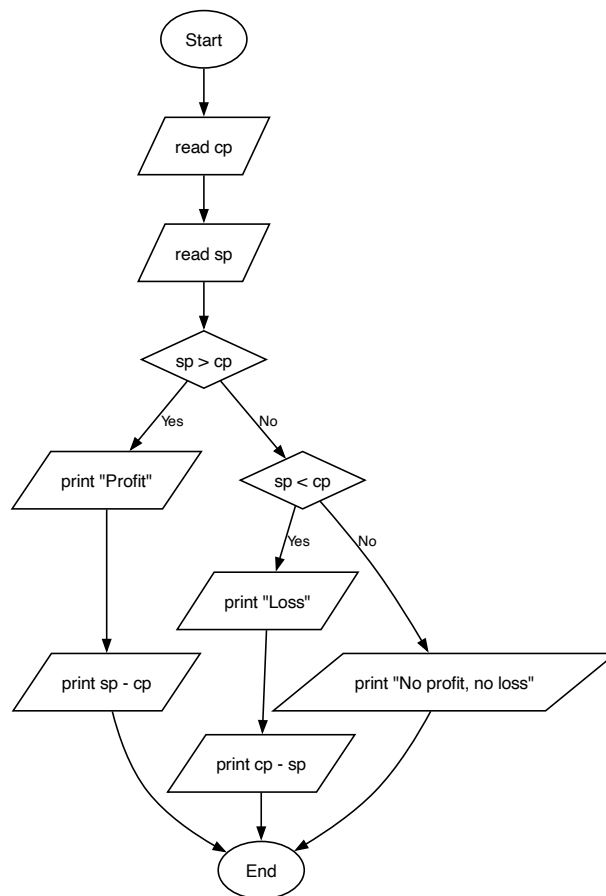

Problem 10.

(i) Expected output for each input:

input cp	input sp	output
100	130	Profit, 30
100	80	Loss, 20
100	100	No profit, no loss

(ii) Flowchart:

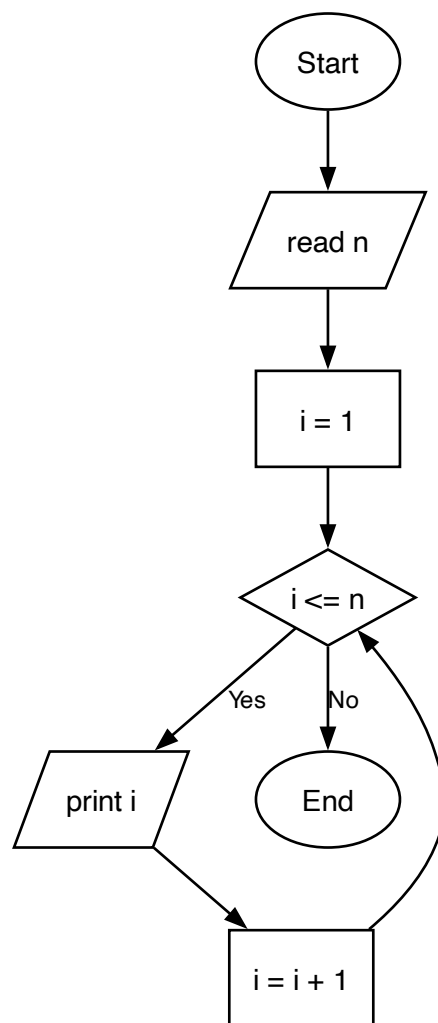

Problem 11.

(i) Expected output for each input:

input n	output
5	1, 2, 3, 4, 5
1	1
3	1, 2, 3

(ii) Flowchart:

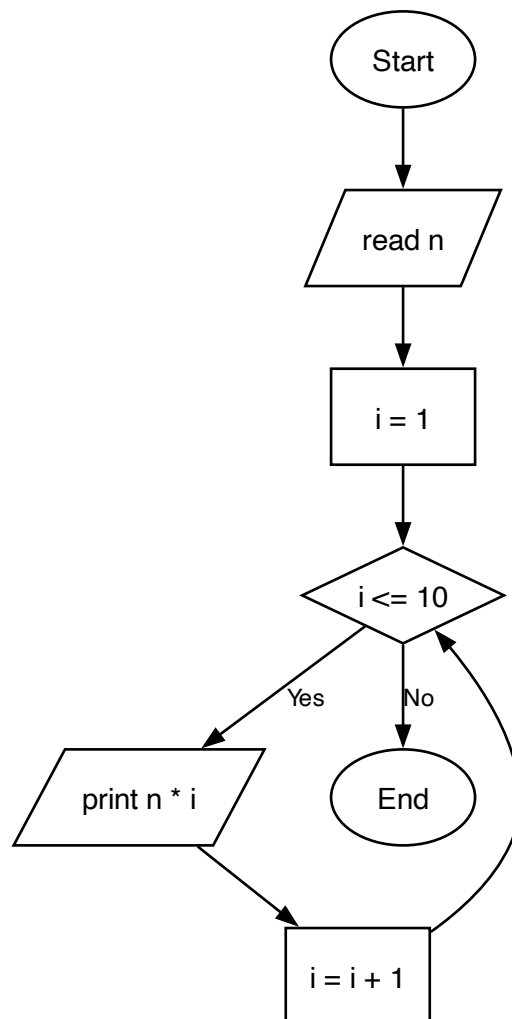

Problem 12.

(i) Expected output for each input:

input n	output
7	7, 14, 21, 28, 35, 42, 49, 56, 63, 70
3	3, 6, 9, 12, 15, 18, 21, 24, 27, 30

(ii) Flowchart:

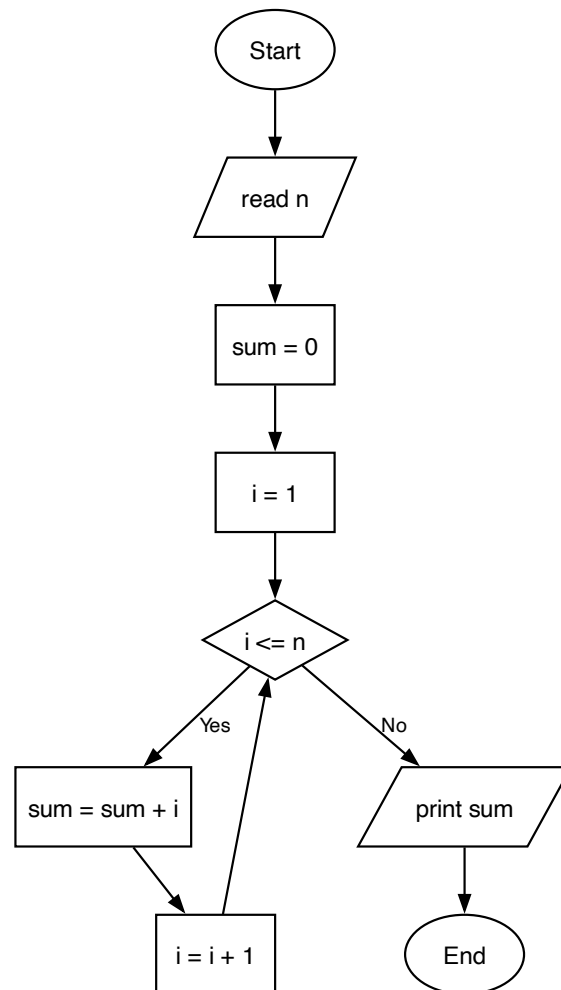

Problem 13.

(i) Expected output for each input:

input n	output
4	10
1	1
6	21

(ii) Flowchart:

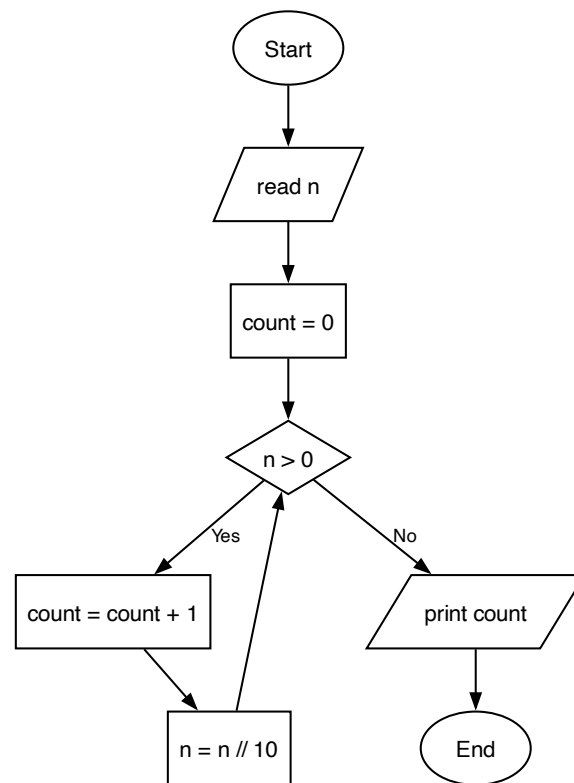

Problem 14.

(i) Expected output for each input:

input n	output
4072	4
538	3
9	1

(ii) Flowchart:

Problem 15.

(i) Expected output for each input:

input n	output
8	2, 4, 6, 8
5	2, 4
1	

(ii) Flowchart:
