Question 1 - Predict the output**[4 marks]**

The **Total** and **N** variables have already been created. Work through the script below **one block at a time** and answer the questions under it. Do not run it in Scratch - the point is to predict what it will do. Keeping a rough trace table in the margin is the easiest way to track the variables.

**1 (a) The output****[2 marks]**What number does the script **say** when it finishes?**1 (b) The counter****[1 mark]**What is the value of **N** when the script finishes?**1 (c) The else branch****[1 mark]**How many times does the **else** branch run?*- End of Question Paper -*
